Food Will Be Scarce In '46

Grow More to Eat More

On February 21, 1946, President Truman urged continuation of war program on Victory Gardens. He further stated:

"The threat of starvation in many parts of the world and the urgent need for food from this country emphasize the importance of continued effort to add to our total food supply this year. A continuing program of gardening will be of great benefit to our people. In addition to the contribution gardens make to better nutrition, their value in providing outdoor physical exercise, recreation, and relaxation from the strain of modern life is widely recognized."

HOW IMPORTANT IS A GOOD LAWN?

A well-kept lawn provides the proper setting for the home; it is the background and foundation of your garden; it enhances the value of your property. Mr. J. W. Johnston, in an article in The New York Herald-Tribune, states, "If one single piece of advice were asked as to how to win a garden prize, the answer would be, 'first get a good lawn'."

Spring (until end of May) and late Summer (August 15th to October 1st) are the best seasons to make or renovate a lawn.
